Job Title: Junior Developer
Department: Digital
Location: Bournemouth
Salary: Flexible DOE

We are Quantum.

A team of thinkers and doers. People that understand people. A challenger brand working with challenger brands. We practice what we preach. Creativity. Agility. Impact. We do what it takes to change behaviour. To make the complex, simple. To make the theory, tangible. To make the intimidating, inspiring. For consumers. Shoppers. Stakeholders. We turn strategy into action. And action is needed everywhere.

Big ideas. Many places.

Who we are
Quantum is an award-winning independent brand experience agency.

Put simply, we love what we do, and for the last eighteen years we've been creating the best, truly motivating experiences for our clients. We work with some of the biggest global FMCG clients and take an insight-driven approach to creating campaigns that prompt action with their customers. With a deep understanding of our industries, a strategic view of their business, and incredibly talented creative and digital teams, we craft experiences that captivate audiences.

Job Role
As a Junior Developer, you will work within our digital team on a range of amazing brands in the drinks and FMCG industries.

Working closely with our head of digital, development team and design studio, you will help to both scope and build high-performing, and beautifully designed websites and applications. You will be passionate about developing code and enjoy working in a collaborative team.

You will gain experience of using a range of technologies, including PHP, MySQL, JavaScript, HTML, CSS, whilst working on various web server platforms.

Note you will also have the opportunity to work with and further expand your skills around modern technologies like: Node.js, Vue.js, REST APIs, Web Apps etc.

Prior knowledge of CMS frameworks like WordPress, Laravel or similar is a plus.
