Job Title: App Developer
Department: Digital
Location: Bournemouth
Salary: £DOE

Who we are

Quantum is an award winning independent brand experience agency of 30 awesome staff. Put simply, we love what we do, and for the last 15 years we've been creating the best, truly motivating experiences for our clients. Experiences that sell products.

We work with some of the biggest global FMCG clients, and take an insight-driven approach to creating campaigns that really sing to their customers. With a deep understanding of our industries, a strategic view of the full shopper journey, and incredibly talented creative and digital teams, we craft experiences that captivate audiences with seamless interactions and personal connections across digital, retail and all of the touchpoints in between.

About the role

We're looking for a Developer to work with us on an awesome native app build, that will launch in the next 6-months. This role is therefore a 6-month fixed term contract, with the opportunity to go full-time afterwards if desired.

Experienced in developing native applications you will:

- Develop and implement a new and innovative digital mobile application to be launched for one of our biggest.
- Use your experience to assist with the user experience of the application.
- Write testable, readable, and scalable code in accordance to clean code principles.
- Take proactive ownership of tasks and see them through to completion; including coding, testing and software deployment.
- Work closely with an awesome team of designers to bring your ideas to life.
- Provide technical leadership and knowledge to develop junior team members.
- Help launch the app to market across the iOS and Android stores.

The following skills and experience are essential for this role:

- Strong JavaScript skills with significant experience working with cross-channel solutions such as React or Node.
- A keen eye for developing beautifully crafted, high performing, secure applications.
- Experience in using automated testing platforms UI testing frameworks.
